2 Master’s in Genomic Medicine: PGdip, Master’s application

Process for genomic medicine Master’s students who have been awarded a PGcert and wish to apply for a PGdip; or have been awarded a PGdip and wish to apply for a full Master’s degree.

The below information will be obtained using the HEE GEP application form. Your chosen university will start this process.

- Applicant applies to their chosen university to undertake additional modules to achieve either a PGdip or Master’s degree.
- University notifies Health Education England’s Genomics Education Programme (HEE GEP) using the application form, to include:
  - applicant’s name;
  - contact details; and
  - a statement confirming the individual’s capability and previous modules completed.
- HEE GEP will contact the applicant to obtain their job title, organisation and line manager details. A 500-word statement will also be required from the applicant, to include:
  - evidence that the individual has tried to obtain funding elsewhere;
  - information about how they are actively involved in the GLH/GMSA structure or GMS; and
  - how they plan to utilise the qualification following award.
- HEE GEP contacts the applicant’s line manager for the supporting statement, which must include:
  - evidence that the qualification aligns to local/regional workforce plans; and
  - information about how the knowledge gained will be utilised locally/regionally/nationally.
- Supporting statement received back by the date specified. The panel meet regularly to review applications.
- HEE GEP decision communicated to the applicant and the university.
